

DXC Pension Plan – DXC and LPC Sections

Defined Contribution Assets - Statement of Investment Principles

1. Introduction

1.1 The purpose of this Statement of Investment Principles ("the Statement") is to document the principles and policies governing decisions about the investment of the assets of the CSC Defined Contribution Section of the DXC Pension Plan ("DXC DC Section") and LPC Defined Contribution Section of the DXC Pension Plan ("LPC DC Section"). This statement has been prepared by the Trustee of the DXC Pension Plan ("the Trustee"). The contents of this SIP apply to both Sections (together referred to as "the Plan" throughout) unless otherwise specified.

It sets out the Trustee's policy for complying with

- The Pensions Act 1995, as amended by the Pensions Act 2004;
- The Occupational Pension Schemes (Investment) Regulations 2005, as amended by the Occupational Pension Schemes (Charges and Governance) Regulations 2015; and,
- Subsequent legislation.
- 1.2 The Trustee has consulted DXC Technology ("the Company") on the Statement, and the Trustee has received written advice from the Plan's investment consultants, Mercer Limited ("Mercer"), which is regulated by the Financial Conduct Authority ("FCA") in relation to investment services.
- 1.3 The Trustee maintains an Investment Policy Implementation Document ("IPID"), which contains more detail on the Plan's investment arrangements. This document, whilst complementing the Statement, does not form part of the Statement and therefore the principal employer is not consulted in relation to changes to this document.
- 1.4 A copy of this Statement will be sent to the Plan's investment managers. The Trustee is committed to review the Statement at least once every three years and without delay upon a material change to the Plan or the Company.
- 2. This Statement also covers the various Additional Voluntary Contribution arrangements for the Defined Benefit sections in the DXC Pension Plan. A separate Statement of Investment Principles has been prepared in respect of the Defined Benefit arrangements.

3. **Objectives of the Plan**

The Trustee recognises that individual members have differing investment needs and that these may change during the course of a member's working life. The Trustee also recognises that members have different attitudes to risk. The Trustee believes that members should be allowed to make their own investment decisions based on their individual circumstances.

In order to encompass these factors the Trustee has agreed the following objectives:

- To make available a range of investment options that should enable members to tailor their own investment strategy to meet their own individual needs.
- To offer funds which allow diversification of risk and long-term capital growth.
- To provide a default investment option for members who do not make their own investment decisions. This is designed to be broadly appropriate for the needs of the majority of the membership.

The Trustee undertakes to review the Plan's fund choices offered to members and the investment manager arrangements on a regular basis.

4. Investment Policies

The Trustee has made available a range of individual self-select fund options for investment in addition to the default investment option. A range of asset classes has been made available; for the DXC DC Section this includes: equities, diversified growth funds, a number of blended multi-asset funds, money market investments, gilts and pre-retirement (annuity targeting) funds. For the LPC DC Section this includes: equities, gilts and cash. It is the Trustee's policy to offer both active and passive management options to members where appropriate, depending on asset class.

In selecting assets, the Trustee considers the liquidity of the investments in the context of the likely needs of members. All assets are daily dealing and therefore should be realisable based on member demand. In addition, assets are mainly invested on regulated markets.

The Trustee's policy in relation to the balance between the different kinds of investment is set out in the 'Investment Options' section. Further details of the funds and lifestyle strategies used in the Plan are set out in the IPID. Members also have the option to combine the funds in any proportion in order to determine the expected return on a member's assets and should relate to the member's own risk appetite and tolerances.

The Trustee's policy in relation to expected return is to make funds available to members that are spread across the expected risk/return spectrum. Each fund used in the Plan has an associated benchmark or target return which the Trustee views as the expected return. The expected return targeted by each is shown in the IPID. This includes assets that target long term growth in real terms and assets that are expected to be less risky and more defensive in nature.

The Trustee recognises that "risk" in the context of a defined contribution pension plan is multi-faceted. In broad terms, it's regarded as the likelihood of failing to achieve the objectives set out in the previous section and have, on the advice of Mercer, taken several measures which are set out in this Statement to mitigate these risks, so far as is possible. The list below is not exhaustive but covers the main risks that the Trustee considers and how they are managed.

Risk	How it is managed	How it is measured
Inflation Risk The real value (i.e. post inflation) value of members' accounts decreases.	The Trustee provides members with a range of funds, across various asset classes, with the majority expected to keep pace with inflation (with the exception of the some of the funds, such as money market and fixed interest bond funds). Members are able to set their own investment allocations, in line with their risk tolerances.	Considering the real returns (i.e. return above inflation) of the funds, with positive values indicating returns that have kept pace with inflation.
Pension Conversion Risk Member's investments do not match how they would like to use their pots in retirement.	The Trustee makes available three lifestyling strategies for DC members in the DXC DC Section, each targeting either cash, drawdown or annuity. In the LPC Section a single lifestyle strategy is available, targeting cash. Lifestyle strategies automatically switch member assets as they approach retirement into investments that are expected to be less volatile relative to how they wish to access their pension savings. These lifestyling strategies increase the proportion of assets that more closely match the chosen retirement destination as members approach retirement. This aims to reduce the risk of a substantial fall in the purchasing power of their accumulated savings near retirement.	Considering the returns of the funds used within the switching phase of the lifestyle strategy both in absolute terms as well as relative to inflation, cash or annuity prices (depending on their selected retirement destination).
Market Risk The value of securities, including equities and interest bearing assets, can go down as well as up.	The Trustee provides members with a range of funds, across various asset classes. Members are able to set their own investment strategy in line with their risk tolerances. For the multi-asset funds which are targeting non-market benchmarks (e.g. CSC Targeting Drawdown and CSC Diversified Growth funds), this	Monitoring the performance of investment funds on a quarterly basis.

is delegated to investment managers.	
Delegated to investment managers. Members are able to set their own investment allocations, in line with their risk tolerances.	Monitoring the performance of investment funds on a quarterly basis.

The investment consultant also provides manager ratings which examine the forward looking expectations of the fund meeting objectives (where the funds are researched).	rating of funds on an ongoing basis relative to the fund's benchmark and stated targets/objective
-----------------------	---	--

The risks identified in the above table are considered by the Trustee to be 'financially material considerations'. The Trustee believes the appropriate time horizon for which to assess these considerations within should be viewed at a member level. This will be dependent on the member's age and their selected retirement age. It is for this reason that a number of lifestyle options have been made available to members.

Member views on non-financial matters are not taken into account in the selection, retention and realisation of investments.

5. **Responsible Investment and Corporate Governance**

The Trustee believes that environmental, social and corporate governance ("ESG") factors may have a material impact on investment risk and return outcomes. The Trustee also recognises that long-term sustainability issues, including climate change, present risks and opportunities that increasingly require explicit consideration. Details on how these are considered are set out in separately in the Trustee's ESG Beliefs Statement.

Having considered its fiduciary duty, the Trustee has delegated the evaluation of ESG factors, including climate change considerations, and exercising voting rights and stewardship obligations attached to the investments, to the appointed investment managers in accordance with their own corporate governance policies and current best practice, including the UK Corporate Governance Code and the UK Stewardship Code. The manager's engagement polices are expected to include all relevant matters including performance, strategy, capital structure, management of actual or potential conflicts of interest, risks, social and environmental impact and corporate governance.

The Trustee considers how ESG, climate change and stewardship is integrated within investment processes when appointing new managers and monitoring existing managers. These issues are monitored by the Trustee which takes advice from the investment consultant's assessment of how the fund managers incorporate ESG. Monitoring is undertaken on a regular basis and is documented at least annually to assess the effectiveness of applied approaches.

The Trustee has not set any investment restrictions on the appointed investment managers in relation to particular products or activities, but may consider this in future.

Equity managers who are FCA registered are expected to report on their adherence to the UK Stewardship Code on an annual basis.

6. Arrangements with Asset Managers

- 6.1 The Trustee appoints investment managers based on their capabilities and, therefore the perceived likelihood of achieving the expected return and risk characteristics required for the asset class being selected. The Trustee look to its investment advisor for their forward looking assessment of a manager's ability to outperform over a full market cycle. The advisor's manager research ratings assist with due diligence and questioning managers during presentations to the Trustee and are used in decisions around selection, retention and realisation of manager appointments.
- 6.2 As the Trustee invests in pooled investment vehicles they accept that they have limited ability to influence investment managers to align their decisions with the Trustee policies set out in this statement. However, appropriate mandates can be selected to align with the Trustee's overall investment strategy.
- 6.3 The Trustee expects investment managers to incorporate the consideration of longer term factors, such as ESG factors, into their decision making process where appropriate. Voting and engagement activity should be used by investment managers to discuss the performance of an issuer of debt or equity. The Trustee also considers the investment adviser's assessment of how each investment manager embeds ESG into its investment process and how the manager's responsible investment philosophy aligns with the Trustee's responsible investment policy. The Trustee will use this assessment in decisions around selection, retention and realisation of manager appointments.
- 6.4 The Trustee's focus is on longer-term performance but shorter-term performance is monitored to ensure any concerns can be identified in a timely manner. The Trustee reviews both absolute and relative performance against a portfolio or underlying investment manager's benchmark on a quarterly basis, including assessments of both shorter and longer time horizons. The Trustee also relies upon Mercer's manager research capabilities. The remuneration for investment managers used by the Plan is based on assets under management; the levels of these fees are reviewed annually as part of the annual value for members assessment to ensure they continue to represent value for members. If performance is not satisfactory, the Trustee may request further action be taken, including a review of fees.
- 6.5 Portfolio turnover costs for each of the funds are reviewed on an annual basis as part of the annual value for members assessment. The ability to assess the appropriateness of these costs is currently limited by the availability of data and the lack of industry-wide benchmarks. The Trustee will monitor industry developments in how to assess these costs and incorporate this in future value for members assessments. Importantly, performance is reviewed net of portfolio turnover costs.
- 6.6 The Trustee is a long term investor. All funds are open-ended and therefore there is no set duration for manager appointments. The Trustee is responsible for the selection, appointment, monitoring and removal of the investment managers. The available fund range and default options are reviewed on at least a triennial basis. A manager's appointment may be terminated if it is no longer considered to be optimal nor have a place in the default strategies or general fund range.

7. Investment Options

7.1 The Trustee offers a range of investment options to the members. The Trustee believes that this range of options is suitable for meeting the investment objective and risk considerations detailed in Sections 2 and 3 respectively.

DXC DC Section

- 7.2 The range of investment options available includes three lifestyle investment options. The Lifestyle options involve investments being switched gradually over an individual's lifetime in the Plan from assets that target long term real growth (e.g. equities) to assets that are considered less risky and in line with how the members wishes to take their retirement savings (e.g. cash, bonds, diversified growth funds). If members wish to do this, then they will also need to select their target retirement age.
- 7.3 Where members do not choose their investment option when joining the Plan (or when there is a later need to make a choice), the Trustee will invest their contributions in the default lifestyle option, the CSC Targeting Drawdown Lifestyle Option (set out below and detailed in section 7).
- 7.4 The Trustee has also made available a pre-design range of growth funds with various expected risk levels as self-select options. In addition, The Trustee offers all members the choice of three funds that helps prepare for how a member wishes to access their benefits at retirement.

LPC DC Section

- 7.5 The range of investment options available includes a Lifestyle investment option. The Lifestyle option has been designed to be suitable for members wishing to take their retirement savings in the Plan as single or multiple cash withdrawals and involves investments being switched gradually over an individual's lifetime in the Plan from assets that target long term real growth to assets that are considered less risky as members near retirement. If members wish to do this, then they will also need to select their target retirement age.
- 7.6 Where members do not choose their investment option when joining the Plan (or when there is a later need to make a choice), the Trustee will invest their contributions in the default lifestyle option, the LPC Lifestyle Option (set out below and detailed in section 9).
- 7.7 In addition, the Trustee has made available four self-select funds with various expected risk levels.
- 7.8 Further details of the funds available in both Sections and their objectives are set out in the IPID.

8. **DXC DC Section - Default Option – Statement of Investment Principles**

The Trustee recognises that many members may not wish or feel able to make investment decisions. As such, the Trustee has made available a default investment arrangement.

The default investment arrangement, which is the CSC Targeting Drawdown Lifestyle Option, has two phases: the accumulation phase and the consolidation phase. When

a member is younger, their account is invested in funds that aim for long-term growth (accumulation phase) in excess of inflation. To counter the greater impact on member outcomes of investment risk as a member's savings grow, the default strategy seeks to reduce investment risk (by increasing the allocation to a diversified range of assets) as the member approaches retirement.

8.1 Aims and Objectives

The aims of the default option, and the ways in which the Trustee seeks to achieve these aims are detailed below:

- To generate returns in excess of inflation during the growth phase of the strategy whilst managing downside risk.

The default option's growth phase invests in the CSC Multi Asset Default fund comprised of holdings of 75% in global equities and 25% in a diversified growth fund. These investments are expected to provide long-term growth above inflation with some downside protection.

- To provide a strategy that reduces investment risk for members as they approach retirement.

As a member's account grows, investment risk will have a greater impact on member outcomes. Therefore, the Trustee believes that a strategy that seeks to reduce investment risk as the member approaches retirement is appropriate.

The CSC Targeting Drawdown Lifestyle Option therefore aims to reduce volatility near retirement via automated switches over a 7-year period to a member's selected retirement date. Investments are gradually switched from growth-oriented assets (largely global equities) into a combination of a diversified growth fund (which has an allocation consisting of traditional and alternative assets) and a cash fund for capital preservation purposes.

- To provide exposure at retirement to assets that are broadly appropriate for an individual planning to use their savings in the Plan to invest in an income drawdown product and to take a 25% tax-free cash lump sum at retirement.

At the member's selected retirement date, 75% of the member's assets will be invested in a diversified growth fund and 25% in a cash fund.

8.2 **Policies in relation to the default option**

The Trustee's policies in relation to the default option are:

- A range of asset classes are included within the default investment option (within the blended funds used), including: developed market equities, emerging market equities, money market investments and diversified growth funds. All funds are daily-dealt pooled investment arrangements, with assets mainly invested on regulated markets. It is the Trustee's policy to utilise both active and passive management within the default investment option, depending on the asset class.

- The pooled funds are commingled investment vehicles. The selection, retention and realisation of securities within the pooled funds are delegated to the manager in line with the mandates of the funds.
- In designing the default, the Trustee has explicitly considered the trade-off between risk and expected returns. Risk is not considered in isolation, but in conjunction with the expected investment returns and outcomes for members. The Trustee took advice from their investment consultant when deciding on this asset allocation. The asset allocation is consistent with the expected amount of risk that is appropriate given the age of a member and when they expect to retire.
- In selecting assets, the Trustee considers the liquidity of the investments in the context of the likely needs of members. All assets are daily dealing and therefore should be realisable based on member demand. In addition, assets are mainly invested on regulated markets.
- The Trustee has also taken into account the needs of members with regards to security, quality, liquidity and profitability of a member's portfolio as a whole. The Trustee has designed the default option taking account of the assets in the default.
- The default option manages investment risks and other risks through a strategic asset allocation consisting of equities, diversified growth funds and cash. Risk is not considered in isolation, but in conjunction with expected investment returns and outcomes for members.

Risk	How it is managed	How it is measured
Inflation Risk The real value (i.e. post inflation) value of members' accounts decreases.	During the growth phase of the default investment option the Trustee invests in a diversified range of assets which are likely to grow in real terms.	Considering the real returns (i.e. return above inflation) of the funds, with positive values indicating returns that have kept pace with inflation.
Pension Conversion Risk Member's investments do not match how they would like to use their pots in retirement.	The default investment option is a lifestyling strategy which targets flexible access income drawdown as a retirement destination. The Trustee believes that a strategy targeting drawdown also minimises the overall pension conversion risk for the relevant members accessing pots in a	Considering the returns of the funds used within the switching phase of the lifestyle strategy both in absolute terms as well as relative to inflation (the retirement destination). As part of the triennial default strategy review, the Trustee ensures the default destination remains appropriate.

 The Trustee has considered risks from a number of perspectives. The list below is not exhaustive but covers the main risks that the Trustee considers and how they are managed.

	different manner (annuity or cash).	
Market Risk The value of securities, including equities and interest bearing assets, can go down as well as up.	The default investment strategy is set with the intention of diversifying this risk to reach a level of risk deemed appropriate for the relevant members by the Trustee. For the diversified growth funds which are targeting non-market benchmarks this is delegated to investment managers.	Monitoring the performance of the default investment strategy on a quarterly basis.
Counterparty Risk A counterparty, either an underlying holding or pooled arrangement, cannot meet its obligation.	Delegated to investment managers. Members are able to set their own investment allocations, in line with their risk tolerances.	Monitoring the performance of investment funds on a quarterly basis.
Currency Risk The value of an investment in the member's base currency may change as a result of fluctuating foreign exchange rates.	A large proportion of equity allocation of the default investment option is currency hedged. Within the diversified growth fund the currency risk management is delegated to investment manager. Investment strategy is set with the intention of diversifying this risk to reach a level of risk deemed appropriate for the relevant members by the Trustee.	The Trustee reviews the level of currency hedging used in the equity portfolio as part of the triennial default strategy review. Monitoring the performance of investment funds on a quarterly basis. Consideration to the movements in foreign currencies relative to pound sterling provided by the investment consultant as part of quarterly investment monitoring reports.
Operational Risk A lack of robust internal proceses, people and systems.	Outsourced this to the investment consultant. Trustee considers manager research which includes operational aspects from their investment consultant.	Consideration to the ratings of investment strategies from their investment consultant and monitoring these on a quarterly basis.

Liquidity Risk Assets may not be readily marketable when required.	The Trustee accesses daily dealt and daily priced pooled funds.	In line with the main Plan.
Environmental, Social and Governance Risk ESG factors can have a significant effect on the performance of the investments held by the Plan e.g. extreme weather events, poor governance.	In line with the Plan. The Trustee's policy on ESG risks is set out in Section 4 of this Statement.	In line with the main Plan.
Manager Skill / Alpha Risk Returns from active investment management may not meet expectations, leading to lower than expected returns to members.	The performance of active funds within the default is monitored by the Trustee and their investment consultant. The investment consultant also provides manager ratings which examine the forward looking expectations of the fund meeting objectives.	The Trustee considers the ratings of investment strategies from their investment consultant during the selection process. Trustee monitors performance and rating of funds on an ongoing basis relative to the fund's benchmark and stated targets/objective

- The risks identified in the above table are considered by the Trustee to be 'financially material considerations'. The Trustee believes the appropriate time horizon for which to assess these considerations within should be viewed at a member level. This will be dependent on the member's age and their selected retirement age. It is for this reason that a number of lifestyle options have been made available to members.
- Member views on non-financial matters are not taken into account in the selection, retention and realisation of investments.
- If members wish to, they can opt to choose their own investment options from a wide range at any time including two other lifestyle strategies. Members are supported by clear communications in the form of an investment guide regarding the aims of the default option and the access to alternative funds, albeit the Trustee will not provide advice to members on their individual choice of investment options.

8.3 Suitability of Default Investment Strategy

Based on its understanding of the DXC DC Section's membership, the Trustee believes that the above objectives and policies reflect members' best interests. The rationale underpinning this belief is as follows:

- The Trustee believes that most members save into a pension plan to achieve an income in retirement. However, the Trustee also believes that members will utilise the flexibility now available to them at retirement. The targeting of income drawdown at retirement is aligned with both these beliefs. This does not mean that default members have to take their benefits in this format at retirement it merely determines the investment strategy that will be in place pre-retirement.
- Based on DXC DC Section experience to date, almost all members withdraw taxfree cash at retirement. The use of the Cash fund within the default option addresses that requirement.
- Members seeking an adequate income in retirement will likely need to achieve real investment returns for most of their period as pension savers. The use of a fund with significant weightings in global equities during the accumulation phase addresses that requirement.

The Trustee intends to monitor members' decisions and other inputs from time to time to ensure that the default option remains suited to their needs. A strategic review will take place at least triennially, or after significant changes to the DXC DC Section's demographics, if sooner.

9. CSC DC Section - Additional self-select defaults

In accordance with the Occupational Pension Schemes (Charges and Governance) Regulations 2015, the Trustee has identified an additional investment option, the CSC All Shares Adventurous Fund (Active), which should be treated as a 'default arrangement' (as defined by these regulations) in addition to the current default investment option (as detailed in section 7). This fund has been identified as a 'default arrangement' as member contributions have been automatically directed to replacement funds without members having instructed the Trustee where their savings and future contributions are to be invested. Details of the aims, objectives and policies in relation to this fund are set out in the table below.

DXC.technol

Fund	Trustee's policies
CSC All Shares	Trustee's Aims and Objectives
Adventurous	To provide members with a fund that:
Fund (Active)	 provides broad exposure to global equity by investing in UK equity and overseas equity; and
	 is actively managed and seeks to outperform its benchmark return of the relevant UK and overseas indices.
	Types of investment primarily held
	This fund invests entirely in equities.
	Expected return
	The expected return will be in line with that of the funds target which is to outperform its benchmark (30% FTSE All Share Index/70% MSCI World Index IMI (Net)).
	Other policies
	Policies relating to risk, realisation of assets, financially material considerations, members' views on non-financial considerations are consistent with those set out in section 3 of this Statement.
	Policies relating to responsible investment and corporate governance and arrangements with the asset manager are consistent with those set out in section 4 and section 5 respectively.
	Member's best interests
	The fund is designed to meet its objective as outlined above. This fund has been deemed a default due to fund mapping exercises. As part of these mapping exercises the Trustee considered this fund to be an appropriate replacement to the option being removed. The Trustee continues to monitor the performance of this fund quarterly and review the appropriateness of this fund at least triennially.

Fund	Trustee's policies
CSC Targeting	Trustee's Aims and Objectives
Cash	To provide members with a fund that:
	 Offers reasonable preservation of capital (although not guaranteed) whilst earning a cash return. It is primarily designed to lock in investment gains during the run-up to retirement on the part of the member's benefit, which are expected to be taken as cash at retirement
	Types of investment primarily held
	This fund invests in a diversified portfolio of high credit quality short term fixed income and variable rate securities.
	Expected return
	The expected return will be in line with short term cash rates (benchmark is 7 day LIBID).
	Other policies
	Policies relating to risk, realisation of assets, financially material considerations, members' views on non-financial considerations are consistent with those set out in section 3 of this Statement.
	Policies relating to responsible investment and corporate governance and arrangements with the asset manager are consistent with those set out in section 4 and section 5 respectively. <i>Member's best interests</i>
	The fund is designed to meet its objective as outlined above. This fund has been deemed a default due to a fund mapping exercise. As part of this mapping exercise the Trustee considered this fund to be an appropriate replacement to the option being removed. The Trustee continues to monitor the performance of this fund quarterly and review the appropriateness of this fund at least triennially.

10. LPC DC Section - Default Option – Statement of Investment Principles

10.1 Aims and Objectives

The aims of the default option, and the ways in which the Trustee seeks to achieve these aims are detailed below:

- To generate returns in excess of inflation during the growth phase of the strategy whilst managing downside risk.

The default option's growth phase invests 100% in equities. These investments are expected to provide long-term growth above inflation.

- To provide a strategy that reduces investment risk for members as they approach retirement.

As a member's account grows, investment risk will have a greater impact on member outcomes. Therefore, the Trustee believes that a strategy that seeks to reduce investment risk as the member approaches retirement is appropriate.

The Default therefore aims to reduce volatility near retirement via automated switches over a 7-year period to a member's selected retirement date. Investments

are gradually switched from equities into a cash fund for capital preservation purposes.

- To provide exposure at retirement to assets that are broadly appropriate for an individual planning to withdraw their savings in the Plan as cash at retirement.

At the member's selected retirement date, 100% of the member's assets will be invested in a cash fund.

10.2 **Policies in relation to the default option**

The Trustee's policies in relation to the default option are:

- A range of asset classes are included within the default investment option, including: equities and money market investments. All funds are daily-dealt pooled investment arrangements. It is the Trustee's policy to utilise both active and passive management within the default investment option, depending on the asset class.
- The pooled funds are commingled investment vehicles. The selection, retention and realisation of securities within the pooled funds are delegated to the manager in line with the mandates of the funds.
- In designing the default, the Trustee has explicitly considered the trade-off between risk and expected returns. Risk is not considered in isolation, but in conjunction with the expected investment returns and outcomes for members. The Trustee took advice from their investment consultant when deciding on this asset allocation. The asset allocation is consistent with the expected amount of risk that is appropriate given the age of a member and when they expect to retire.
- In selecting assets, the Trustee considers the liquidity of the investments in the context of the likely needs of members. All assets are daily dealing and therefore should be realisable based on member demand. In addition, assets are mainly invested on regulated markets.
- The Trustee has also taken into account the needs of members with regards to security, quality, liquidity and profitability of a member's portfolio as a whole. The Trustee has designed the default option taking account of the assets in the default.
- The default option manages investment risks and other risks through a strategic asset allocation consisting of equities and cash. Risk is not considered in isolation, but in conjunction with expected investment returns and outcomes for members.
- The Trustee has considered risks from a number of perspectives. Policies relating to risk, financially material considerations, members' views on non-financial considerations are consistent with those set out in section 3 of this Statement.
- If members wish to, they can opt to choose their own investment options from the self-select range available. Members are supported by clear communications in the form of an investment guide regarding the aims of the default option and the access to alternative funds, albeit the Trustee will not provide advice to members on their individual choice of investment options.

10.3 Suitability of Default Investment Strategy

Based on its understanding of the LPC DC Section's membership, the Trustee believes that the above objectives and policies reflect the best interests of the majority of members.

The Trustee intends to monitor members' decisions and other inputs from time to time to ensure that the default option remains suited to their needs. A strategic review will take place at least triennially, or after significant changes to the LPC DC Section's demographics, if sooner.

11. Switching

Members are responsible for reviewing their investment choices in light of their own circumstances.

Members may redirect future contributions or transfer their accumulated account between funds at any time prior to setting up their retirement benefits.

There are no administrative charges for switching, but members may incur transaction costs on selling and buying units.

12. Additional Voluntary Contribution ('AVC') arrangements

The Plan permits members to provide additional benefits for themselves through the defined contribution investment options available by paying AVCs.

DXC (Defined Benefit) Section

Members have the option of a number of funds with Legal & General Investment Management ('LGIM') and a SEI actively managed fund. Further details of the funds available are set out in the IPID.

Rebus (Defined Benefit) Section

Members have the option of a number of funds with Standard Life. Further details of the funds available are set out in the IPID.

LPC (Defined Benefit) Section

Members' AVC assets are invested in funds with Prudential and ReAssure. Further details of the funds available are set out in the IPID.

13. Monitoring the Investment Manager

- 13.1 The investment managers provide details of performance of the relevant funds in which the Plan invests.
- 13.2 Mercer is retained as investment consultant to assist the Trustee in fulfilling its responsibility for monitoring the investment managers.

14. Investment Adviser Fee Structures

14.1 A full fee breakdown of Manager fee scales can be found in the Plan's IPID.

15. Compliance with this Statement and Review of this Statement

We, the Trustee and Mercer, our consultant who has been appointed by the Trustee, each have distinct duties that are designed to ensure compliance with this Statement.

These are:

- The Trustee will review this Statement at least once every three years, or more frequently if required, upon a material change to the Plan or the Company.
- Mercer will provide the advice needed to allow us to review and update this Statement.

As part of the service provided by LGIM and SEI (the "managers"), they meet, when required, with the Trustee to review their performance, at which time they will also provide written reports specific to the Plan's investments. Additionally, the managers will supply the Trustee with a general written report about the overall performance of the underlying funds on a quarterly basis.

September 2021

Signed on behalf of the Trustee of the DXC Pension Plan.
