

LifeSight

The Chair of Trustee's Annual Governance Statement

5 April 2023

The Chair's Annual Governance Statement – 5 April 2023

Governance requirements apply to defined contribution (DC) pension schemes, to help members achieve a good outcome from their pension savings.

The Trustee of LifeSight (the 'Scheme') is required to produce an annual statement (the 'Statement'), which is signed by the Chair of the Trustee, to describe how these governance requirements have been met. When preparing this Statement, the Trustee has taken account of the relevant statutory guidance

This Statement covers the period, known as the 'Scheme Year' from 6 April 2022 to 5 April 2023 and describes how the Scheme has achieved governance standards in relation to:

1. The investment options in which members' funds are invested during the Scheme Year.
2. The net return on the investments utilised by members, including those used historically that still hold assets.
3. The requirements for processing financial transactions.
4. The charges and transaction costs borne by members, including an illustration of the cumulative effect of these costs and charges.
5. Assessment of the value provided to members of the Scheme.
6. Trustee Knowledge and Understanding (TKU) in relation to individual Trustees and the Trustee Board as a whole.
7. The Trustee Board and member representation.

Appendices

Appendix 1: Charges and transaction costs and Illustrations:

These are shown by each employer or group for the Scheme year (as required by law). Full data is not yet currently available to show net returns for five years or more for all funds – entries are N/A where this is not available. Your group number can be found in your latest Benefit Statement. If you are unable to find this information, please contact the administration team lifesightsupport@willistowerswatson.com.

Appendix 4: Statement of Investment Principles

Appendix 5: Implementation Statement

Simon Ellis
20 September 2023

1. Investment options

The Trustee is responsible for the Scheme's investment governance, which includes setting and monitoring the investment strategies for the Scheme's Default arrangements.

A 'Default' arrangement is any investment fund or strategy in which members' funds have been automatically invested without the member having made an explicit choice.

The Scheme is used as a Qualifying Scheme for automatic enrolment, therefore members' funds are often placed into a default investment arrangement at the outset of their membership, where they can either choose to remain or to select a different investment option.

Default arrangements apply to members in the Savings section of the Scheme. Members of the Spending section (i.e., those members who have begun to access their savings) are required to choose an investment option.

1.1. The Scheme's Statement of Investment Principles ('SIP')

The Trustee has prepared a SIP which governs its decisions about the Scheme's investments including:

- a. The Trustee's aims and objectives in respect of the Default investment arrangements, and the Scheme's other investment arrangements, including how the assets of the Default investment arrangements are invested in the best interests of members.
- b. The Trustee's policies in relation to the:
 1. Kind of investment funds and strategies to be made available.
 2. Balance between the different kinds of investment.
 3. Risks associated with the investments, including how these are measured and managed.
 4. Expected return on investments.
 5. Liquidity and realisation of investments (i.e., when investments are sold or changed).
 6. Financially material considerations over the appropriate time horizon of the investments, including how those considerations are taken into account in the selection, retention and realisation of investments.
 7. The extent to which non-financial matters, including environmental, social and governance (ESG) and ethical considerations are considered in the acquisition, retention, and disposal of investments by the investment manager.
 8. The exercise of rights (including voting rights) attaching to the investments and undertaking engagement activities in respect of the investments (including the methods by which, and the circumstances under which, the Trustee would monitor and engage with relevant persons about relevant matters).
 9. Arrangements with any fund managers, including how the:
 - a. Arrangement with the fund manager incentivises them to align their investment strategy and decisions with the Trustee's policies.
 - b. Fund manager is incentivised to make decisions based on assessments about medium to long-term financial and non-financial performance of an issuer of debt or equity and to engage with issuers of debt or equity to improve their medium to long term performance.

1. Investment options

- c. Method (and time horizon) of the evaluation of the fund manager's performance and the remuneration for fund management services are in line with the Trustee's policies.
- d. Trustees monitor portfolio turnover costs incurred by the fund manager, and how they define and monitor targeted portfolio turnover or turnover range.
- e. Duration of the arrangement with the fund manager.

A copy of the Trustee's SIP is appended to this Statement, in Appendix 4.

1.2. The Scheme's Default investments

As mentioned, a Default is any investment option in which members' funds have been automatically invested without the member having made an explicit choice. Default arrangements are, therefore, designed to ensure that assets are invested in the best interests of members and their beneficiaries.

In addition to Default arrangements, members also have the option to invest in other Lifecycle strategies, as well as a number of other self-select funds (known as 'Free-Choice' funds).

Default arrangements can be 'traditional Defaults', i.e. investments into which members' monies are automatically invested unless they make an active investment decision; or 'additional Defaults', i.e. investments into which members' monies are moved without their involvement (this is called 'mapping'. Mapping typically happens when a new participating employer joins the Scheme and there is a transfer without member consent of the member's past assets from another arrangement); or into which members' contributions may be redirected (for example following the closure of a fund). Such funds are all subject to the appropriate level of governance and charge cap for a Default fund (the pensions charge cap – currently 0.75% - is set by the Government and is a limit on how much savers into DC pensions can be charged in their Scheme's Default arrangements).

The Scheme's standard Default investment strategy is the **Medium Risk Drawdown Lifecycle**:

- **What is a Lifecycle?** A Lifecycle is an investment strategy that seeks to provide the member with the right balance between the potential for return and risk appropriate to how close they are to their retirement age. The Scheme offers nine Lifecycle strategies reflecting the three main ways that members take their benefits at retirement (cash lump sum(s), annuity purchase, drawdown), and three levels of risk tolerance (lower, medium, higher). The investments that make up the Lifecycle strategies will change over time as a member approaches retirement.
- **Why drawdown?** The majority of members of the Scheme are expected to use drawdown as the main way that they take their pension benefits at retirement.
- **Why medium risk?** The Default targets the needs of the majority of members. However, there is a distribution around this – those ahead on the savings journey can de-risk while those behind may need to increase risk. The Scheme's choice framework sits around the Default, naturally making the Default the middle risk option.

In addition, the Scheme also provides the ability to offer different Defaults for participating employers and/or member cohorts (within a participating employer) to reflect the profile and needs of different groups. The majority of the Scheme's core Lifecycles (see next section) are also used in this way as Defaults, and all are governed as such. Different participating employers are referred to as 'groups'. Group 0022 has a **Bespoke Lifecycle** strategy which is used as a Default.

From 6 April 2023, Trustees must report the amount of any specified performance-based fees incurred for each default arrangement during the Scheme Year. During the Scheme Year there were no performance-based fees applicable to the funds used in the Scheme's default arrangements (or indeed to any of the funds available under the Scheme).

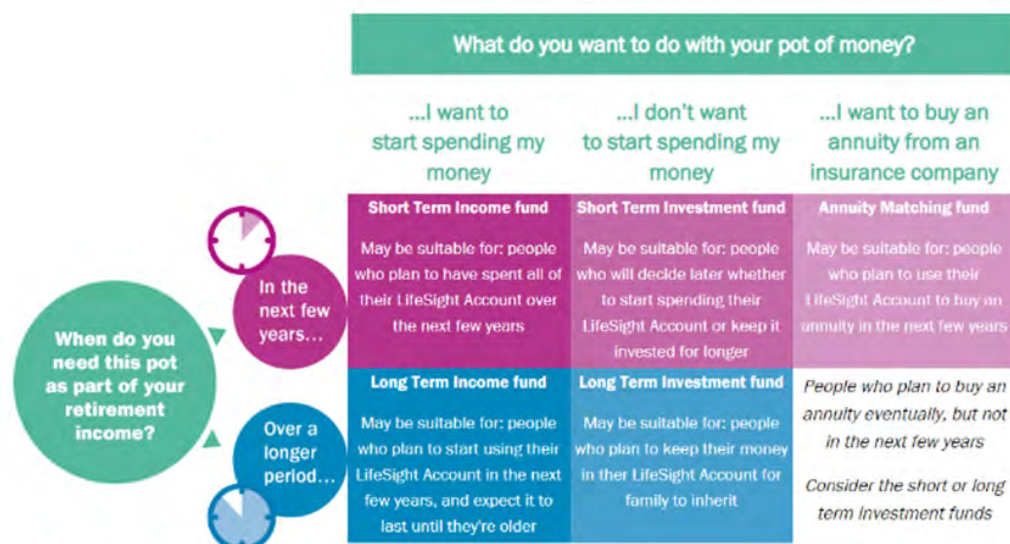

1. Investment options

1.3. The Scheme's Default investments

All nine Lifecycles offered (in the image below) could, at some stage, be used as a Default, and have been designed accordingly:

Retirement option	Drawdown	Higher Risk Drawdown	Medium Risk Drawdown	Lower Risk Drawdown
	Annuity	Higher Risk Annuity	Medium Risk Annuity	Lower Risk Annuity
	Cash	Higher Risk Cash	Medium Risk Cash	Lower Risk Cash
		Higher	Medium	Lower
		Approach to investment risk		

In July 2022, the Trustee introduced five new objective-focused investment options for members of the Spending phase of LifeSight to choose from should they wish, helping members to align their investment strategy with their objectives for retirement:

1. Investment options

1.4. Bespoke Lifecycle

LifeSight offers a bespoke Default; a Drawdown Lifecycle for members of Group 0022, which invests in a combination of the LifeSight Equity, Diversified Growth, and Cash funds and Legal and General Investment Management's Retirement Income Multi-Asset Fund.

1.5. Reviewing investments including the Defaults

As required by legislation, the Trustee carries out a formal, detailed, strategic review of the Lifecycle strategies and the Scheme's entire fund range, including the Defaults, at least triennially (the '**Three-Year Review**'). The last Three-Year Review was carried out in September 2021.

The Three-Year Review conducted in 2021, concluded that the current Default arrangements (i.e., the 'traditional' Defaults, 'additional' Defaults and 'redirected' Defaults, as described above) remained appropriate. This was because there were no significant changes to the quantitative analysis or qualitative views held by the Trustee about Lifecycle design.

The next Three-Year Review is due to be carried out in September 2024.

In addition to the Three-Year Review process, the Trustee carries out an oversight review on an annual basis to assess the continued appropriateness, or otherwise, of all the strategies and underlying funds. This oversight review includes but is not limited to consideration of past performance and ongoing costs and charges against their objectives and benchmarks. WTW, as investment consultant to the Trustee and on their delegated authority, will take any actions identified as a result of this review. The latest annual oversight review was completed as at 30 September 2022 and concluded that all strategies and funds remained suitable for members and consistent with the SIP, and therefore resulted in no further planned changes.

The Trustee also reviews on an ongoing rolling basis the suitability of the Defaults used for each participating employer. Any recommended changes are discussed with the Employer and, where appropriate, implemented. Defaults were reviewed for three employers during the Scheme Year, one of which was deemed suitable, one was recommended for change and a change has since been implemented, and one required further analysis to be undertaken (which is currently ongoing).

The Trustee developed a Carbon Journey Plan, with a spotlight on climate change and deforestation, which was implemented in July 2022 and is due to be reviewed annually from July 2023. Overall, carbon emissions will determine the physical effects of climate change on the planet in the long run and the Trustee is committed to achieving net zero emissions portfolio by 2050. The Carbon Journey Plan is a framework for managing and monitoring the carbon emissions of a portfolio through time. It sets out an objective (in terms of reduction targets and timescales), the methods for achieving the objective and a carbon metric for measurement. The objectives of the annual Carbon Journey Plan review are:

- It forms an important part of the Trustee's governance of the Scheme's Sustainable Investment and ESG risks and opportunities.
- It presents an opportunity for the Trustee to consider all relevant Sustainable Investment and ESG reporting and ask questions of key delegates.
- It informs the Scheme's annual implementation statement, in particular the voting and engagement section.
- The climate-related metrics provided in this review will inform the Scheme's annual Task Force on Climate-related Financial Disclosures (TCFD) statement.

2. Net investment returns

The Trustee is required to report on the net investment returns for their default arrangement(s) and for each Free-Choice fund in which members have assets invested during the Scheme Year.

Net investment returns refer to the returns on funds minus all transaction costs and member-borne charges (Please see section four for a detailed description of costs and charges).

Appendix 1 sets out the net investment return over the Scheme Year to 5 April 2023 (and over five years where available), for each default arrangement and Free-Choice fund available to Savings and drawdown Spending members. These are broken down by each employer or group.

Appendix 2 separately shows the net investment return over the Scheme Year to 5 April 2023 (and over five years where available), for savings members aged 25, 45 and 55, for each default arrangement. These are broken down by each employer or group.

When preparing this section of the statement, the Trustee has taken account of the Department for Work and Pensions (DWP)'s statutory guidance on "Completing the annual Value for Members assessment and Reporting of Net Investment Returns".

3. Processing of financial transactions

Core financial transactions” include (but are not limited to) the:

- Investment of contributions
- Transfers in/out
- Investment switches
- Payments out of the Scheme to, or in respect of, members/beneficiaries.

The Trustee is satisfied that the Scheme’s ‘core financial transactions’ have been processed promptly and accurately during the Scheme Year:

- i. The Trustee receives reports on a quarterly basis from the Scheme Administrator, Investment Manager, and the Scheme’s Financial Controller. These reports provide assurance to the Trustee that there are adequate controls in place to ensure the promptness and accuracy of financial transactions.
- ii. Service Level Agreements (‘SLAs’) are in place with the Scheme Administrator and Investment Manager and are included in the reporting received. The SLAs cover a range of processes, such as individual member transfer requests, fund switches, rebalancing and the timeliness of investment of member contributions. Overall, the reported performance against SLAs met Trustee requirements over the year. The Trustee noted that additional legislative requirements for transfers out, which were introduced in September 2021 in order to better protect members against pension scams, resulted in SLAs been exceeded in some instances. Incremental procedural improvements have taken place over the Scheme Year to help make this process more efficient, with a key focus on managing member expectations and raising awareness of the importance of these protective measures.
- iii. The SLAs in place are suitable for the requirements of the Scheme. During the Scheme Year, as part of the Trustee’s assessment of Value for Members, research was conducted into third party administrator’s SLAs. The research used publicly available information and concluded that the Scheme’s SLAs are broadly comparable to the market.
- iv. The Scheme Administrator conducts monthly monitoring, reconciliation, and record keeping of member contribution investments and payments from the Scheme. They have a dedicated contributions interface team. The interface team ensure that all contributions received reconcile to the interface files and any other contributions remittance advice confirmations received from the employers. Once this reconciliation is completed, the interface team arrange for the investment of the contributions with the investment manager and update to the members records. The administration system ensures that any payments from the Scheme involve checking by at least two individuals before being released from the bank account and depending on the amount and nature of the transaction can involve up to four different levels of approval.
- v. The Financial Controller’s reporting includes summaries of contributions by each active employer and the outcome of quarterly payroll sampling checks to further assist the Trustee in achieving comfort in respect of the accuracy of contributions. There were no material issues identified in the Scheme Year. Timeliness of contributions is also shown in detail in the Trustee reporting. Any discrepancies are promptly investigated and reconciled as a matter of urgency with the respective participating employer’s payroll and LifeSight Management Team. The Trustee’s annual Report and Financial Statements are independently audited by the Trustee’s auditor (PricewaterhouseCoopers LLP).

3. Processing of financial transactions

The Trustee has attained independent assurance under the Master Trust Assurance Framework AAF 05/20 in relation to the Scheme's governance processes and internal controls. This supports the Trustee assessment that the Scheme is compliant with TPR's DC Code of Practice 13 on the governance and administration of occupational DC schemes (the 'DC Code'). The Scheme is also compliant with TPR's Code of Practice 5 on reporting late payments of contributions and with the relevant legislation, and TPR's Code of Practice 15 in respect of the authorisation and supervision of master trusts.

The Trustee take steps to ensure data is of an adequate standard to support core financial transactions through the annual common and conditional data testing. In March 2023, the Trustee reviewed the latest annual common and conditional data testing and was content that, overall, data in LifeSight is of a good standard and meets the key requirements as set out by TPR. Data is maintained throughout the year by additional queries to employers in respect of the status of their members, data analysis undertaken for new client onboardings, existence checking and the use of address tracing services where required. During the Scheme Year the Trustee has given regard to the data requirements for pension dashboards and has considered the data held by the Scheme against their intended approach for data matching. Action has been taken to fill a very small number of identified data gaps.

The Trustee confirms that no significant issues arose in respect of processing financial transactions during the Scheme Year.

4. Charges and transaction costs

4.1. Member-borne charges and transaction costs

The Trustee is required to set out the on-going charges borne by members in this statement, which are annual fund management charges plus any other charges incurred in administering the fund and any additional fund expenses (which can include share registration fees, legal fees, auditor fees, custodian fees, etc.), but excluding transaction costs; this is also known as the total expense ratio (TER). The TER is paid by members and is reflected in the unit price of the funds.

The Trustee is also required to separately disclose transaction cost figures that are borne by members. In the context of this statement, the transaction costs shown are those incurred when the Scheme's fund managers buy and sell assets within investment funds.

These charges and transaction costs have been supplied by the Investment Manager. The transaction costs incurred by the investment manager in running the funds are automatically incorporated into the daily fund price for each fund, and therefore are incorporated into the investment manager's net performance figures. Transaction costs for the year are also shown in the tables in Appendix 1. Where these figures were negative, 0% is shown. Further information on transaction costs is provided in Appendix 3.

There is no missing transaction cost data.

During the Scheme Year no members have incurred transaction costs through joining LifeSight as part of a bulk transfer exercise.

4.2. Default arrangement charges and transaction costs

The standard Default investment strategy, the **Medium Risk Drawdown Lifecycle** has been set up as a lifecycle strategy, which means that members' assets are automatically moved between different investment funds as they approach their target retirement date. This means that the level of charges and transaction costs will vary depending on how close members are to their target retirement date and in which fund(s) they are invested.

For the period covered by this statement, annualised charges and transaction costs are set out in Appendix 1. The member-borne charges for the Scheme's default arrangement(s), and the bespoke default arrangements used by some employers, complied with the charge cap.

4.3. Free-Choice options

In addition to the default arrangement, members also have the option to invest in one of the other Lifecycle strategies as well as a number of other Free-Choice funds.

The level of charges for each Free-Choice fund and the transaction costs over the period covered by this statement are set out in Appendix 1.

4.4. Illustration of charges and transaction costs

Over a period of time, the charges and transaction costs that are taken out of a member's pension savings can reduce the amount available to the member at retirement. The Trustee have set out in Appendix 2 illustrations of the impact of charges and transaction costs on different investment options in the Scheme. The illustrations have been prepared in accordance with the DWP's relevant statutory guidance on "reporting costs, charges and other information: guidance for trustees and managers of occupational pension schemes".

As each member has a different amount of savings within the Scheme and the amount of any future investment returns and future costs and charges cannot be known in advance, the Trustee have had to make a number of assumptions about what these might be. The assumptions are explained in Appendix 3.

5. Value for Members

The Trustee has a legal duty to assess the extent to which member borne charges and transaction costs represent good value for members.

There is no precise legal definition of “good value”, however, the Trustee consider that value can be demonstrated when a combination of costs, and the services provided for those costs, is appropriate for the membership of the Scheme as a whole, and when compared to other options available in the market.

The Trustee reviews all member-borne charges (including transaction costs where available) annually, with the aim of ensuring that members are obtaining value for their money, given the circumstances of the Scheme. The assessment is undertaken taking account of the Pension Regulator’s Code of Practice No.13. The date of the last assessment was 5 April 2023.

The Trustee notes that value for members does not necessarily mean the lowest fee, and the overall quality of the service received has also been considered in the assessment.

The steps undertaken by the Trustee in their most recent assessment of value for members are:

Step taken	How
Understand the present demographic of the membership and their views.	<ul style="list-style-type: none"> ■ The demographic of the current membership is considered, alongside factors such as their investment choices and utilisation of the range of tools and services available. ■ A member survey is conducted annually which helps inform the Trustee of members’ views and provides an indication of member engagement and satisfaction. ■ In addition to the member survey there are a number of ways in which members can make their views known to the Trustee, such as a dedicated email address, member presentations, focus groups, and the option to provide a rating following online transactions through the App or website.
Review the member-borne costs and charges, including transaction costs	<ul style="list-style-type: none"> ■ The full range and level of costs and charges applicable to members of the Scheme are identified, including transaction costs. ■ The Trustee considers the extent to which charges may vary, including how member decisions may affect the charges paid. ■ During the Scheme Year, resulting from the onboarding of a new employer, a With Profits Fund and a Guaranteed Growth Fund were assigned to LifeSight. These funds are only available to existing members and closed to new joiners. These are the only funds available to LifeSight members which have a guaranteed element. The Trustee has assessed the broader value of the characteristics of these funds and has considered, for example, whether there are any penalties payable by members upon early withdrawal.

5. Value for Members

Step taken	How
Benchmark the Scheme's costs and services against the broader market	<ul style="list-style-type: none"> Research is conducted to compare the Scheme's costs and charges to similar pension schemes. A comparison of drawdown administration fees payable under the Scheme, alongside those available from other providers in the open market, is also undertaken. Feedback available from competitive tender exercises is considered to help determine the Scheme's position relative to its peers. Comparison is made against available research material published, for example, by the Pensions Regulator.
Obtain evidence, including from key service providers to determine value across four key service areas delivered to members	<p>Investment Governance</p> <ul style="list-style-type: none"> The range, cost and suitability of the available investment options is considered (both default and free choice funds). Investment performance is assessed in the context of their investment objectives and in relation to the costs and charges payable. Associated investment governance and the role of the Trustees' professional investment advisers is included in the assessment, including in relation to environment social governance (ESG). <p>Scheme Management and Governance</p> <ul style="list-style-type: none"> The costs of scheme management and governance, including fees for the Trustee and its advisers are considered against the benefits that the related services deliver to members. The Scheme has an Independent Trustee Board which governs the Scheme with members' interests at the forefront of its decision making and ensures the Scheme is compliant with relevant legislation, such as the charge cap. Consideration is given to external accreditation received under the independently audited Master Trust Assurance Framework process and through the annual supervisory regime required to maintain Master Trust Authorisation from TPR. During the Scheme year an independent third party was engaged to undertake an effectiveness review on behalf of the Trustee, returning positive feedback in respect of the governance structure which contributed to the assessment. <p>Administration</p> <ul style="list-style-type: none"> The cost of providing good quality, compliant, administration services is considered alongside the benefits provided to members. The extent to which the administrator is meeting the agreed service level standards and the quality of those standards, the promptness and accuracy of core financial transactions, and the quality of scheme data is considered. Member activity, feedback and complaints are taken into account. The value of additional services, vital to operation of the Scheme, such as the preparation of financial statements and the review and implementation of any new legislative or legal requirements. <p>Communications</p> <ul style="list-style-type: none"> The quality, quantity and distribution method of communication affects the associated costs, and this is considered against the services received by members. Members have access to an engaging and interactive online platform, including planning tools to help achieve a better outcome. The Trustee continuously measures the success of member communications, including their length, style, frequency, method of delivery, timing and language used, in considering how engaging and accessible communications are for members. Member communications include important signposting to guidance and support where available and are reviewed regularly to include required changes to legislation.

5. Value for Members

Overall, the Trustee believes that members of the Scheme are receiving good value for their money for the charges and costs that they incur. The Trustee believes this because:

- The costs and charges applicable to members of the Scheme provide good value for the services provided, including when compared to the broader market for both Saving and Spending members.
- The range and suitability of investments offered to members, including the comprehensive investment governance surrounding them, provides good value.
- The governance of the Scheme is of high quality. The Trustee Board is independent and seeks continuous improvement through both internal and external review. The control environment under which the Scheme operates is externally credited under the independently audited Master Trust Assurance Framework process and through the annual supervisory regime required to maintain Master Trust Authorisation from TPR. In the Scheme Year, an external governance review was conducted which concluded that the Scheme was well run.
- The administration of the Scheme is of high quality, is efficient in all the areas assessed and represents good value. Performance of the administrator is assessed against the SLAs in place, with tasks broadly completed in line with timeliness and accuracy expectations. The SLAs in place are appropriate and comparable to the market. Complaints are analysed and the ratio of complaints against tasks completed is low.
- The member engagement and communications in force are clear, engaging, easy to understand, and provide good value. Member feedback indicates that members are engaged with the tools and services provided by the Scheme and there are a number of channels for members to make their views known to the Trustee. A communications plan is in place to develop and enhance communications in line with member feedback for all members (active, deferred and savings).

For each new full-services employer, value for members is also considered at the point of onboarding. For the Scheme Year, the Trustee assessed the fees and services agreed for each new employer and concluded they represented value for members.

6. The Trustee's compliance with the statutory knowledge and understanding (TKU) requirements

The Trustee is required to maintain appropriate levels of knowledge and understanding (TKU) to run the Scheme effectively. The table below sets out TKU requirements and how they have been met during the Scheme Year:

Requirement	How met
Be conversant with the trust deed and rules of the Scheme, the Scheme's SIP and any other document recording policy for the time being adopted by the Trustees relating to the administration of the Scheme generally.	<ul style="list-style-type: none"> ■ Annually, a training programme is prepared, reviewed, and implemented following a TKU assessment. The TKU assessment is broadly aligned to TPR's TKU scope guidance requirements and includes each Trustee Director's self-assessment of the following; their working knowledge of the Scheme's Trust Deed and Rules, the current SIP, Trustee documents and policies; knowledge and understanding of the law relating to pensions and trusts and the principles relating to the funding and investment of occupational DC schemes. This on-line review is analysed by governance specialists at WTW and identifies any knowledge gaps among the Trustee Directors. ■ A TKU assessment was completed by the Directors in office in November 2022. Each Trustee Director assessed their knowledge on a scale of 1 to 5 with '1' equating to little or no knowledge and '5' equating to strong knowledge and able to talk in detail about the subject area. The specialist governance team who oversees the assessment assume a minimum level of '3' in the main subject areas and if a score were to fall below 3, an action plan would be agreed (either at an individual level or collective Board level). For the TKU assessment conducted in 2022 there were no subject areas where the score fell below 3. The specialist governance team assessed the results and it was determined that the Board demonstrate a good level of knowledge and understanding, which is comparable to the trustee boards of other large pension schemes. ■ Learning points identified through the annual TKU assessment are documented in the Trustee's Learning and Development Plan. The Trustee's Learning and Development Plan is reviewed annually. ■ The Trustee retains a familiarity with and has access to copies of the current Scheme governing documentation, including the Trust Deed and Rules (together with any amendments), the SIP and key policies and procedures. In particular, the Trustee refers to the Trust Deed and Rules as part of considering and deciding to make any changes to the Scheme and, where relevant, deciding how to settle individual member cases. ■ A number of policies are maintained for TKU, Fit and Proper, conflicts and recruitment and appointment of Trustee Directors, which are reviewed regularly to document the Trustee requirements, beliefs, and processes. A review of all Trustee policies took place during the Scheme Year. Where appropriate policies were combined to create efficiencies and minor updates were made in line with changes to process and requirements. The SIP was also reviewed by the Trustee in the Scheme Year. ■ The Scheme has in place a structured induction process for new Trustees, which was followed when the new Chair of Trustee was recruited during the Scheme Year. This includes a module on the Scheme's governing documentation, including but not limited to; Trust Deed and Rules, SIP, key policies, Business and Continuity Plans. ■ New Trustee Directors are required to complete the Trustee Toolkit (prior to appointment), attend induction sessions in respect of the Scheme, and become conversant with pension legislation and Scheme documentation.

6. The Trustee's compliance with the statutory knowledge and understanding (TKU) requirements

Requirement	How met
Have, to the degree that is appropriate for the purposes of enabling the individual properly to exercise his or her functions as trustee, knowledge and understanding of the law relating to pensions and trusts and the principles relating to investment of the assets of occupational pension schemes.	<ul style="list-style-type: none"> ■ All existing Trustee Directors have completed the relevant parts of TPR's Trustee Toolkit (which is an online training tool for trustees). New Directors are required to complete this prior to joining. ■ A skills matrix is maintained in respect of the Trustee that influences training, planning, and recruitment efforts. Skills held by individual Trustee Directors includes DC pensions, investments/financial markets, administration, experience working in a regulated industry, board level financial literacy, risk management, communications, and member experience. ■ A rolling programme of bespoke Trustee training is maintained and reviewed at least annually. Training is delivered as part of regular quarterly Trustee meetings, as well as through specific training and strategy days, which took place during February, May, and October in 2022. During the Scheme Year training sessions were delivered on investment (including sustainability, the evolution of ESG and reporting metrics), member engagement, the market landscape, the governance of large master trusts, pension dashboards, risk management, and engagement on pensions policy and governance (including Value for Members and the Consolidated Code of Practice). ■ Both individual and collective Trustee training and attendance is recorded in a Trustee training log. ■ The effectiveness of the Trustee is considered on an annual basis against the objectives as set out in the Scheme's Business Plan. This is done by the independent Chair of the Trustee, with the support of the Trustee Board. A performance review of each Trustee Director is undertaken, alongside a review of the Trustee's objectives. The Chair of the Trustee's review is conducted by the Chair of the Audit and Risk Sub-Committee (ARSC). This supports the Trustee Board's view that its TKU is fit for purpose. ■ An independent third-party evaluation of the effectiveness of the Trustee Board and associated governance was presented to the Trustee during the Scheme Year. The review focused on the existing governance framework being fit for purpose, an evaluation of the Board's composition in terms of skills and quality, testing the diversity of the Board's thinking, and the overall dynamics and culture. Overall, the report was positive concluding that LifeSight is a well governed scheme. The Trustee is considering a small number of governance enhancements as the Scheme grows and will report on these, as appropriate, in future Chair's statements. ■ The Trustee receives topical updates and publications, and general pensions-related updates/news from its advisers about matters relevant to the Scheme. ■ The Trustee maintains an Inclusion and Diversity Statement and Objectives that include the Trustee's commitment to diversity of skills, thought, and experience on their Board. Following consideration of Inclusion and Diversity during the Scheme Year, in December 2022 a number of enhancements were agreed by the Trustee. The cognitive diversity of the Board will be actively harnessed by utilising work style assessments and further training is due to be conducted during the second half of 2023. During 2023 the Board are embarking on a search for a new Trustee Director, following the end of a period of office, and are working with recruitment agents specialising in Board diversity.

6. The Trustee's compliance with the statutory knowledge and understanding (TKU) requirements

Requirement	How met
Have knowledge and understanding of the identification, assessment and management of risks and opportunities relating to climate change, including risks and opportunities arising from steps taken because of climate change.	<ul style="list-style-type: none"> ■ The Trustee has progressive and comprehensive policies in place relating to sustainable and responsible investment, as set out in the SIP. ■ The Trustee works closely with its investment advisers to check the progress of the Scheme's sustainable investment credentials, both in general and against the long-term objectives set by the Trustee in respect of ESG and specifically climate related risks. This topic was considered in detail at the Trustee Strategy Day in 2022. ■ The Trustee strongly believe that identification, assessment and management of risks and opportunities relating to climate change is in the best financial interests of the Scheme and its members. During the Scheme Year the Trustee met with TPR to explain its approach to ESG and present its carbon journey plan.

The Trustee is satisfied that it has met the knowledge and understanding duties during the Scheme Year, and that the combined knowledge and understanding of the individual Trustee Directors, together with the advice available to them, enables the Trustee to properly exercise its functions on behalf of members of the Scheme.

7. The Trustee Board and member representation

The Occupational Pension Schemes (Charges and Governance) Regulations 2015 requires that a majority of the Trustee Directors are “non-affiliated”, meaning that they should be independent of the organisations that provide and run the Scheme. This requirement has been met during the Scheme Year as all five Trustee Directors, including the Chair, are non-affiliated and have made written statements attesting to their independence from those involved with running the Scheme.

Following the end of a term of office for the previous Chair, the selection of a new non-affiliated Chair of Trustee Directors (Simon Ellis) took place in the Scheme Year and was supported by an independent search firm and conducted with openness and transparency. The Trustee skills matrix was considered when scoping for this appointment, with a multi-stage interview process, and with interviews conducted by a panel, including members of the Trustee Board. The appointment of new Chair of Trustee Directors is overseen and approved by the Trustee. The term of the new Chair commenced with effect from 1 February 2023 and the appointment of the new Chair, and confirmation of the outgoing Chair with effect from 31 January, were reported to TPR as significant events in line with their requirements

The Trustee has put in place a number of arrangements to encourage members of the Scheme, or their representatives, to make known their views on matters relating to the Scheme. Members may write to or email the Trustee (email and postal addresses are provided in member literature). Members can also speak to the Scheme administrator, who reports to the Trustee on feedback received, and a feedback form is available on the member website.

The Trustee values the opinion of its membership and has a series of channels available for members to provide feedback on their experience, most notably:

- The Annual Survey, which this year focused on the App, Sustainable Investing, and the planning for retirement experience.
- Virtual Focus Groups, providing members with a two-way dialogue to share their feedback.
- Member presentations, including for deferred members of the Scheme.
- A 5-star rating system where members can rate their experience using a simple metric through the online Account, App and after key changes they make (e.g., changing investment choices).

Member feedback, along with feedback received from clients and third-party evaluators, is considered to help the Trustee continue to improve the overall member experience.

The Trustee reviewed its key engagement metrics and its approach to member engagement in March 2023. Engagement in the member survey rose compared to the prior year and online account engagement continues to rise year on year. The number of member presentations held almost doubled in 2022 and engagement was high with a feedback score of 4.8 out of five. The Trustee concluded that its engagement and feedback channels are sufficiently varied and appropriate for the size, nature, and demographic of the Scheme membership.

The names and biographies of the Trustee Directors are publicly available at www.lifesight.com

Illustrations

The following table gives a summary of the projected fund and the impact of all costs and charges. The figures are presented using two member examples; a LifeSight 22 year old recent joiner, and this Group's average member. Additionally, the table includes the performance of the funds over different time periods depending on the age and retirement age of the member.

Example Member	Projection period (years)	Medium risk drawdown		Highest charging fund		Lowest charging fund	
		Before charges	After charges	Before charges	After charges	Before charges	After charges
LifeSight 22 year old recent joiner	1	£6,000	£6,000	£5,900	£5,900	£6,000	£6,000
	3	£13,400	£13,400	£13,100	£12,900	£13,400	£13,400
	5	£21,600	£21,400	£20,700	£20,200	£21,600	£21,500
	10	£45,300	£44,700	£41,800	£39,800	£45,300	£45,000
	15	£75,000	£73,300	£66,200	£61,600	£75,000	£74,100
	20	£111,900	£108,500	£94,500	£85,900	£111,900	£110,100
	25	£156,800	£150,700	£127,300	£112,800	£157,900	£154,700
	30	£209,900	£199,800	£165,400	£142,700	£215,200	£209,900
	35	£271,700	£255,900	£209,500	£176,000	£286,600	£278,300
	40	£342,300	£318,600	£260,700	£212,900	£375,600	£362,900
Group 0002 average member	45	£411,900	£379,400	£320,000	£254,000	£486,500	£467,700
	1	£58,300	£58,200	£57,600	£57,200	£58,400	£58,300
	3	£89,900	£89,300	£87,200	£85,500	£90,200	£89,900
	5	£124,000	£122,800	£118,600	£115,000	£125,000	£124,400
	10	£221,100	£217,100	£205,600	£194,500	£226,500	£224,500
	15	£335,900	£326,700	£306,600	£282,800	£353,000	£348,400
	20	£468,300	£450,900	£423,500	£380,900	£510,600	£501,800
	24	£575,600	£550,300	£530,400	£467,200	£664,200	£650,400

Full assumptions are in Appendix 3, those applicable only to this Group are:

- Contributions are assumed to be paid from age 22 to 67 for the LifeSight 22 year old recent joiner, and 41 to 65 for this Group's average member.
- Contributions assumed are in line with the default contribution structure for this employer. Contributions may differ if a member is not contributing within that particular arrangement or chooses to contribute at a differing level.
- Example members
 - LifeSight 22 year old recent joiner: age 22, retirement age: 67, total initial annual contribution: £3,300, starting fund value: £2,500.
 - This Group's average member: age 41, retirement age: 65, total initial annual contribution: £12,650, starting fund value: £43,500.

Full assumptions are in Appendix 3, those applicable only to this Group are:

- Contributions are assumed to be paid from age 22 to 67 for the LifeSight 22 year old recent joiner, and 40 to 65 for this Group's average member.
- Contributions assumed are in line with the default contribution structure for this employer. Contributions may differ if a member is not contributing within that particular arrangement or chooses to contribute at a differing level.
- Example members
 - LifeSight 22 year old recent joiner: age 22, retirement age: 67, total initial annual contribution: £3,000, starting fund value: £2,500.
 - This Group's average member: age 40, retirement age: 65, total initial annual contribution: £12,855, starting fund value: £33,000.

Full assumptions are in Appendix 3, those applicable only to this Group are:

- Contributions are assumed to be paid from age 22 to 67 for the LifeSight 22 year old recent joiner, and 42 to 65 for this Group's average member.
- Contributions assumed are in line with the default contribution structure for this employer. Contributions may differ if a member is not contributing within that particular arrangement or chooses to contribute at a differing level.
- Example members
 - LifeSight 22 year old recent joiner: age 22, retirement age: 67, total initial annual contribution: £3,000, starting fund value: £2,500.
 - This Group's average member: age 42, retirement age: 65, total initial annual contribution: £5,250, starting fund value: £19,400.

Appendix 1: Charges and transaction costs and Illustrations

Illustrations

The following table gives a summary of the projected fund and the impact of all costs and charges. The figures are presented using two member examples; a LifeSight 22 year old recent joiner, and this Group's average member. Additionally, the table includes the performance of the funds over different time periods depending on the age and retirement age of the member.

Example Member	Projection period (years)	Medium risk drawdown		Highest charging fund		Lowest charging fund	
		Before charges	After charges	Before charges	After charges	Before charges	After charges
LifeSight 22 year old recent joiner	1	£5,400	£5,400	£5,300	£5,300	£5,400	£5,400
	3	£11,500	£11,400	£11,200	£11,000	£11,500	£11,500
	5	£18,800	£18,700	£18,100	£17,600	£18,800	£18,700
	10	£40,300	£39,600	£37,100	£35,300	£40,300	£39,900
	15	£69,500	£67,800	£61,700	£57,400	£69,500	£68,500
	20	£110,000	£106,500	£94,100	£85,800	£110,000	£108,000

Full assumptions are in Appendix 3, those applicable only to this Group are:

- Contributions are assumed to be paid from age 22 to 67 for the LifeSight 22 year old recent joiner, and 42 to 65 for this Group's average member.
- Contributions assumed are in line with the default contribution structure for this employer. Contributions may differ if a member is not contributing within that particular arrangement or chooses to contribute at a differing level.
- Example members
 - LifeSight 22 year old recent joiner: age 22, retirement age: 67, total initial annual contribution: £2,700, starting fund value: £2,500.
 - This Group's average member: age 43, retirement age: 65, total initial annual contribution: £3,892, starting fund value: £12,600.

Full assumptions are in Appendix 3, those applicable only to this Group are:

- Contributions are assumed to be paid from age 22 to 67 for the LifeSight 22 year old recent joiner, and 43 to 65 for this Group's average member.
- Contributions assumed are in line with the default contribution structure for this employer. Contributions may differ if a member is not contributing within that particular arrangement or chooses to contribute at a differing level.
- Example members
 - LifeSight 22 year old recent joiner: age 22, retirement age: 67, total initial annual contribution: £6,300, starting fund value: £2,500.
 - This Group's average member: age 43, retirement age: 65, total initial annual contribution: £6,468, starting fund value: £20,200.

Full assumptions are in Appendix 3, those applicable only to this Group are:

- Contributions are assumed to be paid from age 22 to 67 for the LifeSight 22 year old recent joiner, and 46 to 65 for this Group's average member.
- Contributions assumed are in line with the default contribution structure for this employer. Contributions may differ if a member is not contributing within that particular arrangement or chooses to contribute at a differing level.
- Example members
 - LifeSight 22 year old recent joiner: age 22, retirement age: 67, total initial annual contribution: £3,000, starting fund value: £2,500.
 - This Group's average member: age 42, retirement age: 65, total initial annual contribution: £3,810, starting fund value: £20,600.

Full assumptions are in Appendix 3, those applicable only to this Group are:

- Contributions are assumed to be paid from age 22 to 67 for the LifeSight 22 year old recent joiner, and 47 to 65 for this Group's average member.
- Contributions assumed are in line with the default contribution structure for this employer. Contributions may differ if a member is not contributing within that particular arrangement or chooses to contribute at a differing level.
- Example members
 - LifeSight 22 year old recent joiner: age 22, retirement age: 67, total initial annual contribution: £3,000, starting fund value: £2,500.
 - This Group's average member: age 47, retirement age: 65, total initial annual contribution: £4,230, starting fund value: £19,100.

The following table gives a summary of the projected fund and the impact of all costs and charges. The figures are presented using two member examples; a LifeSight 22 year old recent joiner, and this Group's average member. Additionally, the table includes the performance of the funds over different time periods depending on the age and retirement age of the member.

Example Member	Projection period (years)	Medium risk drawdown		Highest charging fund		Lowest charging fund	
		Before charges	After charges	Before charges	After charges	Before charges	After charges
LifeSight 22 year old recent joiner	1	£5,100	£5,100	£5,000	£5,000	£5,100	£5,100
	3	£10,500	£10,500	£10,300	£10,100	£10,500	£10,500
	5	£16,500	£16,400	£15,800	£15,400	£16,500	£16,500
	10	£34,000	£33,500	£31,300	£29,700	£34,000	£33,700
	15	£55,800	£54,500	£49,200	£45,600	£55,800	£55,100
	20	£83,000	£80,300	£70,000	£63,200	£83,000	£81,500
	25	£116,000	£111,200	£94,000	£82,700	£116,900	£114,200
	30	£155,100	£147,100	£121,900	£104,400	£159,000	£154,600

	15	£67,200	£65,300	£61,400	£56,700	£70,100	£69,200
	20	£95,500	£91,900	£86,300	£77,700	£103,100	£101,100
	25	£124,900	£119,100	£115,100	£100,800	£144,100	£140,700

Full assumptions are in Appendix 3, those applicable only to this Group are:

- Contributions are assumed to be paid from age 22 to 67 for the LifeSight 22 year old recent joiner, and 40 to 65 for this Group's average member.
- Contributions assumed are in line with the default contribution structure for this employer. Contributions may differ if a member is not contributing within that particular arrangement or chooses to contribute at a differing level.
- Example members
 - LifeSight 22 year old recent joiner: age 22, retirement age: 67, total initial annual contribution: £2,400, starting fund value: £2,500.
 - This Group's average member: age 40, retirement age: 65, total initial annual contribution: £2,800, starting fund value: £5,500.

Illustrations - Group 9001:

The following table gives a summary of the projected fund and the impact of all costs and charges. The figures are presented using two member examples; an example LifeSight member, and an average LifeSight member. Additionally, the table includes the performance of the funds over different time periods depending on the age and retirement age of the member.

Example Member	Projection period (years)	Medium risk			Highest charging fund			Lowest charging fund		
		Before charges	After charges	Annual withdrawal	Before charges	After charges	Annual withdrawal	Before charges	After charges	Annual withdrawal
Typical member	1	£64,500	£64,200	£2,600	£64,600	£63,900	£2,600	£65,500	£65,300	£2,700
	3	£63,000	£62,100	£2,600	£63,300	£61,200	£2,500	£66,100	£65,400	£2,700

Full assumptions are in Appendix 2, those applicable only to this Group are:

- No more contributions are assumed .
- Annual withdrawals are assumed to be 4% per year for the example member, and 10% per year for the average member of this group.
- Example members
 - Example new member: age at which member starts to withdraw funds: 55, Estimated pot size at retirement: £87,000, annual withdrawal rate: 4%, tax-free cash lump sum: 25%, initial fund value in illustration: £65,250.
 - Average member: age at which member starts to withdraw funds: 62, Estimated pot size: £254,900, annual withdrawal rate: 10%, tax-free cash lump sum: 25%, initial fund value in illustration: £191,175.

⁵ New fund launched over the year. The Total Expense Ratio and net investment return shown are annualised and relate to the period since inception.

Appendix 1: Charges and transaction costs and Illustrations

Group 9002:

There are a number of charges applicable to sub-groups of this population. We have illustrated these below:

Sub-group 9002:

The annualised charges applied to the spending phase LifeSight strategies for drawdown members are set out below:

Name	Total expense ratio	Transaction costs	Net investment return - 1 year ¹	Net investment return - 5 year ²
Higher Risk strategy	0.2216%	0.0922%	-6.86%	0.74%
Medium Risk strategy	0.2102%	0.0874%	-10.85%	0.19%
Lower Risk strategy	0.1643%	0.0600%	-16.85%	-0.36%
Annuity Matching strategy	0.1533% to 0.2102%	0.0535% to 0.0874%	-18.28% to -10.85%	-0.50% to 0.19%

The charges applied to all other LifeSight Free-Choice funds are set out below.

Name	Total expense ratio	Transaction costs	Net investment return - 1 year ¹	Net investment return - 5 year ²
LifeSight Equity	0.1982%	0.0743%	-4.83%	1.29%

Appendix 1: Charges and transaction costs and Illustrations

Illustrations – Group 9002: Highest charges:

Due to the numerous subgroups in the 9002 section, the following table gives a summary of the projected fund and the impact of all costs and charges for the highest charges in this group. The figures are presented using two member examples; an example LifeSight member, and an average LifeSight member. Additionally, the table includes the performance of the funds over different time periods depending on the age and retirement age of the member.

Example Member	Projection period (years)	Medium risk			Higher charging fund			Lower charging fund		
		Before charges	After charges	Annual withdrawal	Before charges	After charges	Annual withdrawal	Before charges	After charges	Annual withdrawal
Typical member	1	£64,500	£64,100	£2,600	£64,600	£63,800	£2,600	£65,500	£65,300	£2,700
	3	£63,000	£62,000	£2,600	£63,300	£61,100	£2,500	£66,100	£65,300	£2,700
	5	£61,700	£59,900	£2,500	£62,200	£58,400	£2,400	£66,700	£65,300	£2,700
	10	£58,600	£54,900	£2,300	£60,200	£52,300	£2,200	£68,600	£65,400	£2,700
	15	£56,200	£50,400	£2,100	£59,000	£46,800	£1,900	£70,900	£65,500	£2,700
	20	£54,300	£46,200	£1,900	£58,800	£41,900	£1,700	£73,700	£65,500	£2,700
	25	£53,000	£42,400	£1,700	£59,500	£37,500	£1,500	£77,200	£65,600	£2,700
	30	£52,300	£38,900	£1,600	£61,300	£33,600	£1,400	£81,500	£65,700	£2,700
	35	£52,200	£35,600	£1,500	£64,200	£30,100	£1,200	£86,900	£65,700	£2,700
9002 average member	1	£53,800	£53,500	£5,900	£53,900	£53,200	£5,900	£54,700	£54,400	£5,900
	3	£46,400	£45,500	£5,000	£46,700	£44,800	£4,900	£48,700	£48,000	£5,200
	5	£40,100	£38,700	£4,200	£40,700	£37,700	£4,100	£43,400	£42,300	£4,600
	10	£28,400	£25,800	£2,800	£30,000	£24,500	£2,700	£33,100	£30,900	£3,400
	15	£20,800	£17,200	£1,900	£23,600	£15,900	£1,800	£25,900	£22,600	£2,500
	20	£16,100	£11,500	£1,300	£20,000	£10,400	£1,100	£21,100	£16,500	£1,800
	25	£13,200	£7,600	£800	£18,500	£6,700	£700	£18,100	£12,000	£1,300
	28	£12,200	£6,000	£700	£18,300	£5,200	£600	£17,000	£9,900	£1,100

Full assumptions are in Appendix 3, those applicable only to this Group are:

- No more contributions are assumed .
- Annual withdrawals are assumed to be 4% per year for the example member, and 10% per year for the average member of this group.
- Example members
 - Example new member: age at which member starts to withdraw funds: 55, Estimated pot size at retirement: £87,000, annual withdrawal rate: 4%, tax-free cash lump sum: 25%, initial fund value in illustration: £65,250.
 - Average member: age at which member starts to withdraw funds: 62, Estimated pot size: £77,300, annual withdrawal rate: 10%, tax-free cash lump sum: 25%, initial fund value in illustration: £57,975.

Appendix 1: Charges and transaction costs and Illustrations

Illustrations – Group 9002: Lowest charges:

Due to the numerous subgroups in the 9002 section, the following table gives a summary of the projected fund and the impact of all costs and charges for the lowest charges in this group. The figures are presented using two member examples; an example LifeSight member, and an average LifeSight member. Additionally, the table includes the performance of the funds over different time periods depending on the age and retirement age of the member.

Example Member	Projection period (years)	Medium risk			Higher charging fund			Lower charging fund		
		Before charges	After charges	Annual withdrawal	Before charges	After charges	Annual withdrawal	Before charges	After charges	Annual withdrawal
Typical member	1	£64,500	£64,300	£2,600	£64,600	£64,000	£2,600	£65,500	£65,400	£2,700
	3	£63,000	£62,500	£2,600	£63,300	£61,600	£2,500	£66,100	£65,800	£2,700

Full assumptions are in Appendix 3, those applicable only to this Group are:

- A. No more contributions are assumed .
- B. Annual withdrawals are assumed to be 4% per year for the example member, and 10% per year for the average member of this group.
- C. Example members
 - Example new member: age at which member starts to withdraw funds: 55, Estimated pot size at retirement: £87,000, annual withdrawal rate: 4%, tax-free cash lump sum: 25%, initial fund value in illustration: £65,250.
 - Average member: age at which member starts to withdraw funds: 62, Estimated pot size: £77,300, annual withdrawal rate: 10%, tax-free cash lump sum: 25%, initial fund value in illustration: £57,975.

Appendix 2: Age related net investment return data

The Trustee must report on the 'net investment returns' for their default arrangement(s). The tables below detail the annualised one-year returns and annualised five-year returns for the Scheme Year for each employer or group, based on savings members at age 25, 45 and 55.

Entries are N/A where full data is not currently available to show net returns for five years or more.

Appendix 3: Illustration assumptions

The illustrations have been prepared in accordance with the DWP's statutory guidance on "Reporting costs, charges and other information: guidance for trustees and managers of occupational pension schemes".

Assumptions and notes applicable to all illustrations

1. Projected pension account values are shown in today's terms.
2. Contributions (where applicable) and costs/charges are shown as a monetary amount and reductions are made halfway through the year.
3. Investment returns and costs/charges as a percentage reduction per annum are assumed to be deducted at the end of the year.
4. Charges and costs are deducted before applying investment returns.
5. Switching costs are not considered in the lifestyle strategy.
6. Inflation is assumed to be 2.5% each year.
7. Salaries (where applicable) are assumed to increase in line with assumed earnings inflation of 0% per year (in real terms).
8. Values shown are estimates and are not guaranteed.
9. The real projected growth rates for each Saving fund are as follows:
 - a. Medium risk drawdown – from 2.45% to 4.50% (adjusted depending on term to retirement)
 - b. Higher risk drawdown – from 2.80% to 4.50% (adjusted depending on term to retirement)
 - c. Lower risk drawdown - from 1.60% to 4.50% (adjusted depending on term to retirement)
 - d. Medium risk cash – from 1.40% to 4.50% (adjusted depending on term to retirement)
 - e. Higher risk annuity – from 2.15% to 4.50% (adjusted depending on term to retirement)
 - f. CH Drawdown Lifecycle Strategy – from 2.63% to 4.15% (adjusted depending on term to retirement)
 - g. Highest charging fund – 3.00%
 - h. Lowest charging fund – 4.50%
10. The real projected growth rates for each Spending (drawdown) fund are as follows:
 - a. Medium risk – 2.88%
 - b. Highest charging fund – 3.00%
 - c. Lowest charging fund – 4.50%
11. Member charges used in the illustration reflect those applied to members accounts in the period 6 April 2022 to 5 April 2023 and are detailed in this document. Transactions costs have been provided by LGIM and cover the period 1 April 2022 to 31 March 2023.
12. Projected fund values are rounded to the nearest hundred pounds.

Transaction cost data

A zero cost has been used where there are negative transaction costs (i.e., an overall gain was made on the transaction, which can happen as a result of changes in the pricing of the assets being bought or sold). It is not expected that transaction costs will always be negative. It is important to note that using a negative or zero cost during any one scheme year may not accurately represent the actual transaction costs a member may expect to see in any future scheme year.
