The Lifecycle options

LifeSight offers nine Lifecycle investment options, each one is designed to suit different risk and retirement requirements.

Each of the nine Lifecycle options invests in a mix of the four LifeSight ‘building block’ funds:

- LifeSight Equity
- LifeSight DGF
- LifeSight Bonds
- LifeSight Cash

You can **click on each of the 9 boxes** on the right to see a chart of how these building blocks combine for that particular Lifecycle option and how this changes over time.

You can review your investment choices and make a change if you need to via your online account. LifeSight does not charge a fee for changing investment selections online, but you may incur transaction costs.
